PCT/GB00/03273

1 <u>Claims</u> 2

3

1. A catheter having a heat transfer device at or near its distal end, wherein the heat transfer device is layered or coated onto or into the catheter wall.

7

8

9

10

11

2. A catheter as claimed in Claim 1 wherein the heat transfer device is a flexible film having one or more electrical resistor flow paths thereon or therethrough, which film is locatable around the catheter wall.

12 13

14 3. A catheter as claimed in Claim 2 wherein the
15 film is a flexible metal film on which the one
16 or more electrical paths have been etched or
17 otherwise created.

18

19 4. A catheter as claimed in Claim 2 wherein the one 20 or more electrical paths are added onto a 21 plastic film backing.

22

23 5. A catheter as claimed in Chaim 4 wherein the one 24 or more electrical paths are added by a 25 deposition process.

26

27 6. A catheter as claimed in Claim 4 wherein the one 28 or electrical paths are added by a coating 29 process.

30

PCT/GB00/03273

| 1   | 7.  | A catheter as claimed in Claim 1 wherein the    |
|-----|-----|---|
| 2   |     | heat transfer device is disposed directly onto  |
| 3   |     | the catheter wall.                              |
| 4   |     | ·   |
| 5   | 8.  | A catheter as claimed in Claim 7 wherein the    |
| 6   |     | heat transfer device is disposed onto the       |
| 7   |     | catheter wall by a deposition process.          |
| 8   |     |   |
| 9   | 9.  | A catheter as claimed in Claim 8 where in the   |
| 1,0 |     | deposition process is a plasma deposition       |
| 11  |     | process.  |
| 12  |     |   |
| 13  | 10. | A catheter as claimed in Claim 8 wherein the    |
| 14  |     | deposition process is a printing process.       |
| 15  |     |   |
| 16  | 17. | A catheter as claimed in Claim 10 wherein the   |
| 17/ | /h~ | printing process uses a conductive ink or a     |
| îs  |     | conductive layer, with subsequent etching.      |
| 19  |     |   |
| 20  | 12. | A catheter as claimed in any one of Claims 7-11 |
| 21  |     | wherein a temperature sensor material is also   |
| 22  |     | disposed onto the catheter wall by a deposition |
| 23  |     | process.  |
| 24  |     |   |
| 25  | 13. | A catheter as claimed in any one of the         |
| 26  |     | preceding Claims wherein the heat transfer      |
| 27  |     | device includes one or more temperature sensors |
| 28  |     | or sensor leads.                                |
| 29  |     |   |

31

|  |     | 14  |
|--|-----|---|
| 1  | 14. | A catheter as claimed in any one of the                               |
| 2  |     | preceding Claims wherein one or more insulator                        |
| 3  |     | layers are located over the resistor structure.                       |
| 4  |     |   |
| 5  | 15. | A catheter as claimed in Claim 14 wherein one of                      |
| \\rightarro\right\right\right\right\right\right\right\right\right\right\ |     | the insulator layers is parylene C.                                   |
| (18  | 16. | A catheter as claimed in any one of the                               |
| 9  |     | preceding Claims wherein the heat transfer                            |
| 10   |     | device comprises an outer or penultimate outer                        |
| 11   |     | layer of silver or gold/  |
| 12   |     | $\sim$ |
| 13   | 17. | A catheter as claimed in Claim 1 wherein a                            |
| 14   |     | length of the outer wall of the catheter is                           |
| 15   |     | wholly, substantially or partly formed from                           |
| 16   |     | doped material able to act as a heat transfer                         |
| 17   |     | device upon application of power therethrough.                        |
| 18   |     |   |
| 19   | 18. | A catheter as claimed in Claim 17 wherein the                         |
| 20   |     | doped material is silver or gold.                                     |
| 21   |     |   |
| 22   | 19. | A catheter wherein the cathetek wall has one or                       |
| 23   |     | more metal wires therethrough.  |
| 24   |     |   |
| 25   | 20. | A catheter as claimed in Claim 19 wherein the or                      |
| 26   |     | each wire is copper.  |
| 27   |     |   |
| 28   | 21. | A catheter as claimed in Claim 19 or Claim 20                         |
| 29   |     | wherein the or each wire is co-extruded within                        |
| 30   |     | the catheter body.  |

.

July 00 4

22. A catheter as claymed in any one of Claims 19-21 wherein the catheter wall includes one or more sets of wires.

15

5 23. A catheter as claimed in Claim 22 wherein the 6 catheter body has three sets of wires, each set 7 comprising two wires.

8

24. A catheter as claimed in any one of Claims 19-24 wherein they or each wire inside the catheter wall is easily exposable.

12

13 25. A catheter as claimed in any one of Claims 1-18
14 in combination with a catheter as claimed in any
15 one of Claims 19,24.

16

17 26. A catheter as claumed in any one of the above 18 Claims of size 3-5F.

19

20 27. A catheter as claimed in any one of the 21 preceding Claims having a single distal lumen.

22

23 28. A catheter as claimed in Claim 27 wherein the 24 lumen has a diameter of approximately 0.5-07 mm.
